

Important Announcements: Dietistenpraktijk DDiëtist & Cinzento Rosa.

Summer holiday - Summer break:

The practice is closed between 18 July and 26 August.

Possibilities during this stop (by appointment only):

Chat consultations and Photo food diary coaching.

After the Summer Holiday - Summer Break (for current and new clients):

The practice location is only open for current clients (clients registered before the Summer Holidays/Summer Break).

For new clients (registrations after the Summer Holidays/Summer Break) the practice is only open for Weighing Consultations and Digital Consultations (including video calling, photo diary coaching and chat consultations).

Dear clients,

As some already know, I and my family have been planning to emigrate to southern Portugal for a long time. Hereby I make an announcement about our planning, since our house is almost complete. In about 6 months we want to leave (if the planning allows it and there is no delay). So it can also be a bit later

Ofcourse I will report on this in more detail when the planning becomes a bit more certain. Keep an eye on the Instagram / Facebook page of Dietistenpraktijk DDiëtist (you can become a member by following this).

I will continue my practice digitally with new services. Videocalling, chat consultations, photo nutrition diary coaching, remain part of the services, but courses and podcasts via Dietetics Studies are being expanded (www.dietetiekstudies.nl / .com). I will also open a new practice location in southern Portugal for the local population there and from where I will provide and develop the digital services.

Current clients can continue the consultations in the practice until my announced departure (the exact date will therefore still be announced, probably until January 2023), after which converted digitally or possibly transferred to another dietitian. From after the Summer Break, new clients will only be able to register digitally and follow coaching, which in experience is just as effective (and sometimes even more effective in relation to coaching from their own trusted home and is time-saving). If you want to continue the consultations digitally, but miss the weighing moments? Then it is possible to purchase a good scale yourself, in which I can advise which home scale is the most reliable to use during a digital treatment.

With warm regards,

Dascha Willemsen Dietistenpraktijk DDiëtist (Cinzento Rosa & Dietetiek Studies).
